Lipoedema

Symposium Denmark

- Symptoms, Stages, Therapy Options

Lipoedema— what's it all about?

Although Lipoedema was first described already over 80 years ago, it still is a poorly known disorder, which impairs the life of many women.

We would like to share our knowledge and over 20 years of experience in treating lipoedema in the Hanse-Klinik as well as over 30 years of experience in developing and manufacturing compression and support bandages at Eto Garments ApS.

We therefore welcome all who are interested in lipoedema, be it women suffering from the disease or therapists and compression specialists working in the field of lipoedema. We will give you an overview on what is known about lipoedema, how it may develop during lifetime, what factors influence the disease and update you on current treatment options. There will be plenty of time for individual questions and discussions on all presented topics.

Following, there will be the opportunity to have a short individual consultation with the doctors. Herefore a separate registration is required, as capacities are limited. We look forward to meeting you in Ejby!

Program

09:45- 10:00

Welcome

10:00-10:30

Lipoedema- A Challenge:
